

Hello,

I am writing to express my strong interest in an internship or entry level position at your company. I have always had extremely good organizational skills and the ability to learn and adapt quickly in a fast-paced learning environment. I am confident I can contribute to the development of diverse web applications for your clients.

As a detail-oriented individual with experience in prioritizing given tasks and working efficiently alone or in a team to complete them, I am well-equipped to handle the pressure of meeting tight deadlines. On top of that I am the type of person who will work off the clock to complete high quality work that I can be proud of.

I have basic knowledge of React, Next.js, PostgreSQL, MySQL, TypeScript, WordPress CMS, as well as HTML, CSS, JavaScript, and PHP. I believe that my experience in these areas will allow me to contribute to the web and app design and development responsibilities of this position. I also recognize my skills in these areas are extremely fresh and I am constantly pushing myself to learn more and more. I believe that being immersed in a job in this field will only accelerate my learning and advancement as a programmer.

As a Web Developer, I understand that I will be responsible for a mix of research and design activities to support the projects the job calls for. I am confident in my ability to gather and evaluate user requirements, identify, and troubleshoot issues, and provide feedback on enhancement with the development and design team.

Thank you for considering my application. I look forward to the opportunity to further discuss my qualifications and learn more.

Sincerely,

Raymie Segars
