PROFESSIONAL SUMMARY

A highly skilled Full-stack Developer with a solid foundation in both front-end and back-end technologies, including expertise in React, Next.js, Express, and Tailwind CSS. Demonstrates a strong commitment to staying at the cutting edge of technology through continuous learning and active participation in developer communities. Experienced in leveraging social media platforms for knowledge sharing, networking, and exploring innovative project methodologies. Proficient in a wide range of tools and languages, including Git, WordPress, Photoshop, TypeScript, HTML5, CSS3, PHP, and Python, ensuring the delivery of comprehensive web solutions. Holds Associate's Degrees in Software & Web Development and Applied Mathematics & Science, underlining a robust technical background. Passionate about developing scalable and user-centric digital solutions, with a track record of successful projects that enhance user experience and operational efficiency.

CORE COMPETENCIES

Project Management | Full-stack Development | Continuous Learning and Development | Community Engagement | Open-source Contribution | Problem-solving Skills | Innovative Solution Implementation | Agile and Scrum Methodologies | User Experience Optimization | Cross-functional Team Collaboration | Effective Communication

---

PROFESSIONAL EXPERIENCE

Job Board
Description: Created an innovative job board platform designed to simplify the process of job creation and the filtering of existing listings, ensuring a seamless and intuitive user experience. This project identifying user requirements, leading to the implementation of advanced search functionalities and user-friendly interfaces.
Technologies: Next.js, React, Clerk, Zod, PostgreSQL, Tailwind
Outcome: Successfully delivered a dynamic job board platform that significantly improved the job listing.

Farmers Market
Description: Developed an online platform that enables users to easily browse local vendors and their goods for upcoming farmers markets, facilitating community engagement and support for local businesses.
Technologies: Next.js, React, Clerk, Zod, Vercel
Impact: Successfully connected local vendors with a broader consumer base, promoting community engagement and supporting the local economy by providing a convenient, accessible way for users to discover and plan visits to farmers markets. This project demonstrated my ability to manage the full project lifecycle, from conceptualization through to deployment, while employing agile methodologies to meet project milestones and deliver high-quality software solutions.

Note-it
Description: Spearheaded the development of "Note-it," a note-taking platform that emphasizes efficiency in capturing and organizing notes for personal and professional use.
Technologies: React.js, MongoDB, Express, Node.js, Vercel, Railway, Tailwind.css
Achievement: Through comprehensive full-stack development, successfully launched a highly intuitive and effective tool for note organization, enhancing user productivity and data management capabilities.

EDUCATION

Asheville-Buncombe Technical Community College
- *Associate's Degree in Software & Web Development*
- *Associate's Degree in Applied Mathematics & Science*

SKILLS

Frameworks: React, Next.js, Express, Tailwind CSS, Zod
Tools: Git, WordPress, Photoshop, Clerk, Vercel
Databases: PostgreSQL, MongoDB, MySQL
Languages: TypeScript, HTML5, CSS3, PHP, Python
